

Colin Cahill

Lawrence, KS | [linkedin.com/in/colincahill1](https://www.linkedin.com/in/colincahill1)

PROFESSIONAL PROFILE

Business Analytics graduate who designs Python-based AI agents and automations that streamline business workflows and surface data-driven insights. Internship experience in AI automation, invoice auditing, and market research, plus a deployed agentic-AI capstone project, backed by working skills in SQL, Python, and Excel.

TECHNICAL SKILLS

Programming & AI: Python (LangChain, OpenAI API, Pandas, NumPy), SQL, Oracle, Microsoft Copilot Studio, prompt engineering, GitHub

Data & Analytics: Data analysis, data auditing & validation, ER modeling, forecasting, data mining & predictive analytics, Advanced Excel

Business & Process: Business process documentation, requirements gathering, Six Sigma White Belt, Microsoft Dynamics 365

EDUCATION

University of Kansas **Lawrence, Kansas**
Bachelor of Science in Business Analytics *May 2026*

Relevant Coursework: Database Management Systems, Systems Analysis & Design, Data Mining & Predictive Analytics, Data Analysis & Forecasting, Application Development, Foundations of Business Analytics, Information & Management Production Systems

PROFESSIONAL EXPERIENCE

CyberPower Systems (USA), Inc. **Shakopee, Minnesota**
AI Specialist Intern *May 2025 - August 2025*

- Built a custom AI agent that automated invoice auditing for the company's largest distribution clients, saving the department several hours of manual review each week.
- Engineered the agent to flag pricing inconsistencies in rebate claims that could cause the company to overcompensate customers, reducing billing errors and protecting margin.
- Documented company-wide AI opportunities, producing guides on agentic capabilities and their application to facility inventory and customer reporting.

Cloud3 Lab **Los Angeles, California**
Business Analyst Intern *July 2021 - July 2022*

- Conducted market research and competitive analysis on emerging Web3 trends to identify value propositions for product differentiation.
- Built a scalable industry database using advanced Excel functions, turning research into structured, actionable planning documents.

Alpha Kappa Lambda Fraternity **Lawrence, Kansas**
Peer Tutor *August 2024 - May 2026*

- Tutored junior members in SQL, Excel, and data analytics, supporting their technical skill development.

Chipotle Mexican Grill **Overland Park, Kansas**
Crew Member *June 2024 - August 2024*

- Improved workflow efficiency by 25% through team-based best practices and onboarding support for new staff.

PROJECTS & ACTIVITIES

Pathfinder, AI Job-Search Assistant *github.com/cpcahill/Pathfinder*
Python, LangChain, FAISS, OpenAI, Streamlit, SQLite

- Built an autonomous LangChain agent that searches live job postings via API, tracks applications in a SQLite pipeline, and delivers personalized fit analysis using retrieval-augmented generation (RAG) over a FAISS vector store.
- Designed five custom agent tools (job search, application logging, status updates, pipeline view, and metrics) and deployed the app to Streamlit Cloud.

Center for Advanced Professional Studies (CAPS) **Overland Park, Kansas**
Innovation & Entrepreneurship *January 2022 - May 2022*
Digital Design & Photography *August 2021 - December 2021*
